About the list: In this day and age, there are a lot of technology companies in the market, and what makes one stand out from the rest is its ability to stay, and increase its revenue. Here at Lead411, we recognize the Top 500 companies in the country. Out of 1000 companies who sent in their application, we have narrowed down the list to the 500 that showed significant growth and development. The rankings are based on which privately-held organization registered the highest percentage revenue growth from 2007 to 2009. To qualify, the company must be a private-held business in the United States, and should have earned more than \$1 million in the past year.
